

Capillary Dialysers Reprocessing System Dialister Futura II

Innovation Enterprise „IMPULS” presents a modern, high - effective system for regeneration of capillary dialysers.

It's main part is Dialister Futura II - an apparatus, that automatically disinfects and rinses the used dialysers.

The name of the apparatus symbolises a better future in reutilisation and in hemodialysis at all, based on the over twenty years of experience in health care products.

The best engineers, modern production process and hundreds of applications of Dialisters guarantee the highest standard in reprocessing.

Why to reprocess?

Reprocessing of the dialysers is the best way to optimise costs of dialysis, without causing any harm to the quality and safety of the process. Traditionally, after dialysis, the dialyser is considered as a medical waste, which has to be utilised according to medical law.

Our system allows a full regeneration of the dialyser to use it again and again. After use, the dialyser is automatically cleaned and filled up with IMPULS Steridial disinfectant solution. By the next dialysis of the same patient, the dialyser is rinsed and ready to use.

The reutilisation technology is fully validated to ensure the safety of dialysed patients.

Main features

- ☒ Fully automatic process of reutilisation and rinsing
- ☒ Direct use of disinfection concentrates
- ☒ Large LCD screen
- ☒ Modern, neutral design
- ☒ Customised menu and features
- ☒ Full safety for patients: automatic volume and leak proof
- ☒ Minimal space requirements
- ☒ High - quality materials guaranting long life
- ☒ Water resistant shell
- ☒ Highest ergonomy
- ☒ Fully compatible with another parts of IMPULS dialysis system

„IMPULS” for hemodialysis

Reutilisation is for us more than just one device. Impuls offers a complete system, supporting dialysis stations in everyday's activity:

Dialister Futura II
Reutilisation apparatus

Concentrates
Liquid & powder concentrates
for hemodialysis

Nefretete
Alcalisation sweets
for dialysed patients

Steritest
Fast and easy
paper - tests

Steridial & Steridial Forte
Disinfection concentrates

Surfsteril
Surface decontamination spray

Impuls 10SD
Hand disinfectant

Deosan
Surface decontamination
concentrate

Impuls HPV800
Room decontamination system
(Hydrogen Peroxide Vapours)
